Suggestion: when we brief OMB, I think one option to consider using is to say and show how our proposed rule brings parity with OSHA. We should show it element by element in the slides.

For each element - training, respirators, haz comm, field entry -we illustrate how our rule merely brings the WPS bar up to the industrial OSHA std. I think that helps us go on offense rather than playing defense, and vice versa for OMB.

Would the Obama admin want hispanic workers to be protected less well than other workers?

Thoughts?
